

Home Learning Bags – Mathematical development

Mathematics (maths) is an important part of learning for all children in the early years and receiving a good grounding in maths is an essential life skill.

As well as numeracy, it helps skills such as problem solving, understanding and using shapes and measure and developing their own spatial awareness. It helps them to recognise, create and describe patterns, which is essential for early problem solving skills.

In nursery we do lots of counting, sorting, comparing, shape and size activities, it will really help your child's development if you can do some of these sorts of activities at home with them. Lots of maths activities can be done with everyday objects at home.

Your child will bring home a backpack with some resources and ideas of what to do. There is also a comments card to help us evaluate the bags. Your child's Key Person will let you know when to return the bag.

Thank you for your support
